

AddSecure 8-Channel

8-Channel HD Mobile Digital Video Recorder

Ensure every angle is covered with our market-leading multi-camera solution. Employing the latest in integrated multi-camera technology, the AddSecure 8-channel keeps your drivers and the public safe by reducing risk and improving fleet safety. Monitor your valuable cargo, with 8 cameras, an in-cab monitor, and an external panic button. This robust MDVR system has been purpose-built to provide total vehicle visibility to both the transport operator and the driver.

Improve fleet safety and encourage better driving habits on any device, anywhere in the world direct from the web-based fleet management portal. Remotely access live and historic video footage, alongside g-sensor and accelerometer data for full insight into your driver's behaviour whilst out on the road. Use driver specific exemplar

footage for proactive driver coaching, or pair with our driver performance module for comprehensive individualised driver training.

Key features:

- Supports 8 channels (expandable to 12)
- 1080p resolution
- 2TB HDD Storage
- 4G functionality
- Built-in 3x-axis G-sensor
- 12V & 24C compatible (8-36V input)
- Lockable media storage to protect data
- Alarms for sensor triggers, speed, acceleration, video loss, temperature
- Fully integrated telematics platform
- Modern, ruggedised metal housing

Technical specifications

Storage Media Type	HDD, 3D
Max HDD Capacity	2TB
Max SD Capacity	256GB
Channels	8
Resolution	1080p
IPC	4 with IPC-PON-4
IPC Resolution	1080p
Video Output	CVBS
Sensor	Built in G Sensor
USB	Yes
Sensor Inputs	8 with DVR-580-TH
Sensor Outputs	2 with DVR-580-TH
Voltage Range (V)	8-36
Dimensions	295x222x90mm
Operating temperature	-40° to +70° C
Video Compression	H.264
IO	RS23 2x2, RS485x2
Client	EchoMaster Platform
OS	Linux 3.0.6
3G	Yes
4G	Yes
GPS	Yes
