

Co-Driver Services

Co-Driver MobileOffice

A smartphone application for managers who want to keep an eye on their fleet at anytime and anywhere.

Co-Driver MobileOffice is the mobile version of our back-office application for the transport management team. It provides a set of Fleet Management services to manage your fleet and drivers when you are out of the office.

Modern and user-friendly interface

MobileOffice is built with the user in mind, to provide quick and easy access to all the resources. You're fleet positions are accessible in the map in real time. In addition, you are alerted on the deviations by the alarm module.

Navigation

The Main services can be found at the

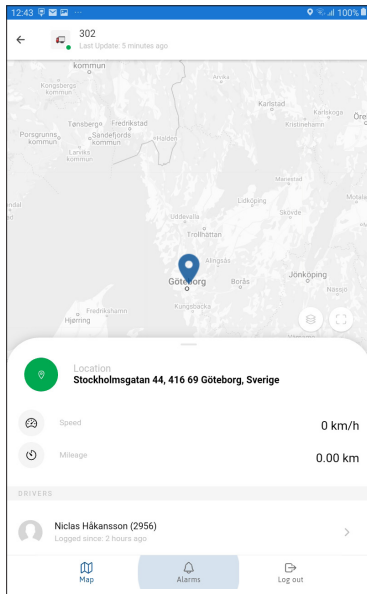

navigation bar at the bottom of the screen in the app.

The MobileOffice app is a hybrid app that can be explained as a mix between a native app and a web application. Hybrid apps are essentially web apps that have been put in a native app shell. Once the app is downloaded the user experience is similar to a native app. The MobileOffice run on both Android and IOS.

Key features

- Fleet Positioning
- Automatic coupled devices
- Tachograph Activity
- Alarm Module

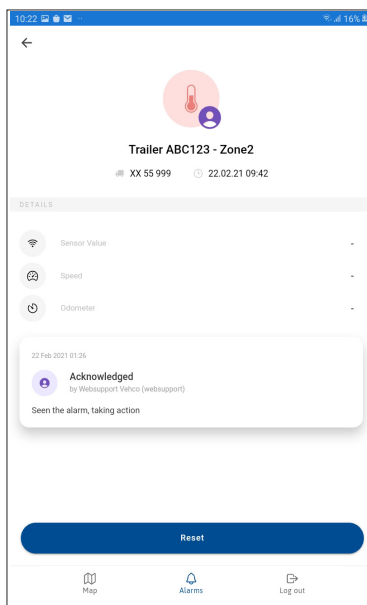

Stay updated and get the positions and other key data about your fleet through Co-Driver MobileOffice on your phone or tablet.

Alarm Module in MobileOffice
